

Sandy DOLLARS & $ENSE

FY24 BUDGET PRIORITIES

The ultimate goal is to continue to provide high-quality services to Sandy City residents and retain the valuable, professional team that delivers these city services.

PUBLIC SAFEY

Increased funding is necessary for life-saving equipment to handle the 8% increase in ambulance call volume. One of the city's two ladder trucks is 24 years old and in need of replacement. With more people using Dimple Dell Park and Bell Canyon trails, additional patrols to maintain public safety are required.

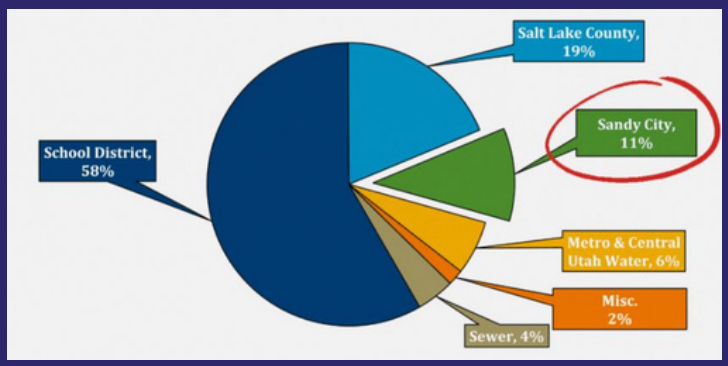

EMPLOYEE COMPENSATION

The average number of employees voluntarily leaving is 33.3 staff members annually over the past decade. Our compensation study shows our pay ranges for public employees are lagging about 10% behind other cities.

FLEET UPGRADES

The city equipment fleet is aging, with a current average age of 9.5 years. Some vehicles are more than 20 years old. Over 40 vehicles are rated RED (meaning maintenance costs are very high and vehicles are often out of service), with another 17 vehicles rated ORANGE (meaning that maintenance costs are quickly growing and dependability is dropping).

PROPERTY TAX ALLOCATION

Sandy City is currently reviewing its budget for the upcoming fiscal year. While a 15% increase is being discussed, it's important to note that this percentage only affects the 11% portion of the budget allocated for local government operations. To understand how this directly affects you, you can examine your property tax statement, specifically the Sandy City line item. On an average-priced home in our city, a 15% increase would amount to approximately $4 per month.
